

AQUACULTURE – PROCESS WATER TREATMENT

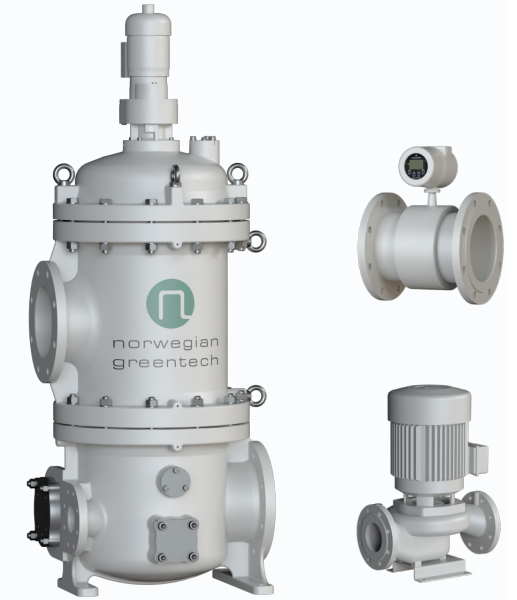

- *Robust UV-systems. Build and tested for decades on sea operations*
- *Veterinærinstituttet certified UV-systems for process water in aquaculture, both landbased and on wellboats*
- *Veterinærinstituttet certified UV-systems, the widest range and biggest capacity in the market*
- *FHI certified UV-systems for consumption and use in fish processing*
- *Most wellboat references in the market*

- > Sensor monitoring the UV-intensity of ALL lamps placed between the lamps, less sensor calibration complexity and costs
- > Automatic wiper cleaning of all quartz sleeves and internal sensor

- > Compact UV chamber, minimal footprint
- > 100m standard cable length between UV chamber and cabinets without need of any special shielded, thick cables
- > 5 years warranty on our power supply
- > Customizable to nearly all flange sizes
- > **SHORT RESPONSE ON SERVICE AND SPARE PARTS**

- > Intuitively and flexible control system gives full overview of the process
- > Different types of filters, pumps and sensors
- > Tailormade solutions, including skids
- > Remote diagnostics and support function
